RHI MAGNESITA

Taking innovation to 1200 °C and beyond

RHI Magnesita is the global leader in refractories. Our customers use extremely high temperatures to make materials such as steel and nonferrous metals, cement, lime, glass, energy and chemicals. They depend on our products and knowhow to contain and control those materials at temperatures of 1200 °C and much, much higher.

We're the global leader in tackling these extreme challenges. And to us, leadership is more than just being the biggest. It's about delivering the most innovative, reliable products and services for our customers. It's about constantly being one jump ahead. It comes from finding, retaining and motivating exceptional people who can do an exceptional job.

Countries shipped to worldwide

Valued people building an open, collaborative culture

Our cultural themes

- 01 Act customer-focused and innovatively
- 02 Have open decision making in a respectful environment
- 03 Operate cross-functionally, collaboratively and pragmatically across the global organisation
- 04 Be performance driven and accountable

≡
We're acknowledged industry leaders in innovative technology. But to deliver results for customers, that technology has to be put to work effectively. By people.

As a valued employer we offer you

- 01 Multicultural, passionate and open working environment**
- 02 Attractive international career opportunities**
- 03 Learning and development at all career levels**
- 04 Autonomy in the development of tasks and projects**

At RHI Magnesita, our employees are defined by four cultural themes. We act **customer-focused** and benefit our clients by demonstrating our **technical innovation** and expertise. Our decisions are made openly within a **respectful environment**. We empower our people to succeed and through **global and cross-functional collaboration** they drive our innovation and growth. Ultimately, we are **performance driven** in every action we take.
